

## PRODUCT REFERENCE SHEET

Humavir®

**H**umavir is an innovative immune support product that combines a proprietary blend of humic acid with an enhancing amino acid complex to work at the cellular level.<sup>†</sup>

### One molecule. Dynamic impact.

Formed from ancient plant matter, humic acid supports immune function and controls inflammation, reducing oxidative stress.

### Advanced through biochemistry.

Humavir's multi-step purification process in combination with patented enhancements unlocks the full potential of humic acid.

### Developmental highlights.

- Multiple human clinical studies completed.
- Assessed by independent third parties for purity and quality.
- Validated real world results.

### Clinical applications.

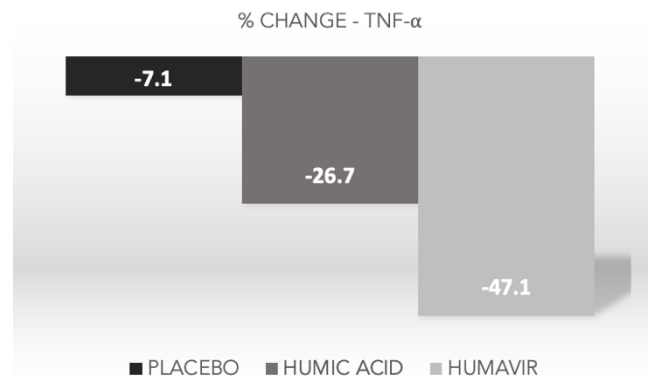

- Supports immune function.
- Supports a balanced inflammatory response.
- Supports an improved sense of wellness.

## HUMAN CLINICAL STUDIES

Two studies were performed to contrast the efficacy of humic acid versus Humavir in adults with influenza over a 14-day interval. A double-blind, randomized, placebo-controlled trial with 37 adults examined humic acid. A follow-up open-label, randomized, placebo-controlled trial with 20 adults assessed Humavir against the same study endpoints. The tables below contrast a marker of inflammation (TNF- $\alpha$ ), a marker of immune function (CD4+ cells), and subjective wellness between the studies.

### Tumor Necrosis Factor Alpha.

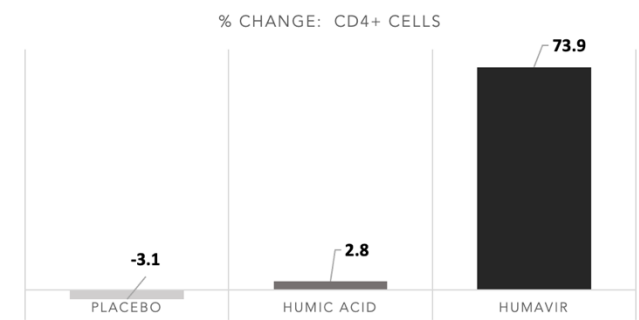

Tumor necrosis factor alpha (TNF- $\alpha$ ) is a protein made by activated immune cells. At moderate concentrations, TNF- $\alpha$  promotes an inflammatory response. Blood samples of study participants revealed a greater decrease in TNF- $\alpha$  concentrations in study participants using Humavir.

To learn more about the relationship between TNF- $\alpha$  and the inflammatory response, go to [humeo.io/the-science](http://humeo.io/the-science).

### CD4+ Immune Cells.

CD4+ cells may be regarded as a benchmark of immune system integrity. Blood samples of study participants revealed a greater increase in CD4+ count in study participants using Humavir versus humic acid alone.

## Visual Analog Scale.

The visual analogue scale is a validated psychometric response scale that is often used to assess subjective characteristics or impressions that cannot be directly measured.

Participants who received product in the two treatment groups, humic acid and Humavir, opined that their improvement at the 7 and 14-day assessment touch points was more robust than either placebo group. In addition, the self-assessments of participants in the Humavir study group were more positive than those using humic acid alone.

PERCENT IMPROVEMENT				
Day	Humic Acid	Placebo	Humavir	Placebo
7	64	54	82.7	35.9
14	107	76	120.8	65.8

## SUPPLEMENT FACTS

Serving Size: 1 capsule

	Serving Dose	% Daily Value
Humic Acid Complex	250mg	*
Amino Acid Complex	5mcg	*
Calories	0g	-
Total Fat	0g	-
Carbohydrate	0g	-
Protein	0g	-

\*Daily value not established.

## DIRECTIONS

May take with or without food.

SUPPORT	DOSE	FREQUENCY
Mild	1 capsule	Twice daily
Moderate	2 capsules	Three times daily
Heavy**	3 capsules	Three times daily

\*Do not exceed nine (9) capsules in 24 hours.

## CAUTIONS

- Consult your healthcare practitioner prior to use.
- Do not use if pregnant or nursing.
- Take Humavir 1 hour before or after mineral supplements to maximize product effectiveness.
- Do not use if tamper evident seal is damaged.

**Proposition 65 Warning for California Residents:** This product can expose you to chemicals, including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

To learn about Advanced Humeomic's approach to Proposition 65 and our product quality and impact measures, go to [humeo.io/prop65](http://humeo.io/prop65).

## SIDE EFFECTS

Humavir may cause loose stools, diarrhea, or cramping in some individuals. Reducing the dose or suspending use resolves this effect.

## STORAGE

Keep tightly closed in a cool, dry place.

## DOES NOT CONTAIN

Wheat, gluten, corn, yeast, soy protein, dairy products, shellfish, peanuts, tree nuts, egg, ingredients derived from genetically modified organisms (GMOs), artificial colors, artificial sweeteners, or artificial preservatives.
